

## 2016 Events

### Appreciation Event at Larz Anderson Auto Museum (2016)

On October 19th 2016, we held an event at the Larz Anderson Auto Museum, to thank some of our clients and bring light to a local nonprofit organization called the EVA Center. It is very important to us to support local agencies that are doing great work within the community, that may not be getting the same recognition as some national platforms.

The EVA Center's mission (standing for Education, Vision & Advocacy), was created in response to the overwhelming need to assist women in the often complex process of exiting out of commercial sexual exploitation. They help provide comprehensive services and long term support for hundreds of women while working to create needed emergency and long term housing options. They also provide awareness-raising campaigns to educate the public about the violence associated with sex trafficking and the role of the demand in driving this trade.

We want to thank everyone who was able to attend this event and for their trust and support in our team. We truly look forward to continuing our relationships with you all and to hosting many more events like this in the future.
